## 1. Overview

"*DynaDoctor*" software analyses data sent from the Dynakit, and supports the status display of outdoor and indoor units of VRF, DI/SDI/IMS System, Hydro Unit and outdoor unit of ESTIA, kWSmart System. This tool can be used to check refrigerant cycle data, display various data graphs, execute indoor unit test runs and create reports of test run results.

Furthermore, received data can be saved and browsed, and secondary use of data can be carried out easily.

## 2. System requirements

The system requirements for this software are as follows,

Item	Specifications
